

HEROS FERRO

MIDDLE

When waste incinerator bottom ash is reprocessed, ferrous and non-ferrous metals are recovered.

The ferrous scrap is then cleaned and sorted by size, resulting in different clean fractions of scrap.

The middle scrap is free from Cu/Fe motors, closed objects etc.

This fraction is most suitable for exporting in considerable quantities in sea containers.

Technical data

Dimensions:	40 to 80 mm
Fe purity:	approx. 95%
Cu:	approx. 1%
Relative density (bulk):	approx. 0.8 t/m ³
EWL code:	19.01.02
Basel code:	B1010

All processes at Heros have been
ISO 9001 and ISO 14001 certified by Kiwa

Heros is a certified member of the MRF.
